research today saves faces tomorrow

BAOS
BRITISH ASSOCIATION
OF ORAL SURGEONS

BAOMS
THE FACE OF SURGERY
British Association of Oral & Maxillofacial Surgeons

This is the first national study on third molars examining the incidence of problems from third molars, the treatment decisions and the long-term outcomes of these decisions.

We invite all dentists and surgeons throughout the UK who treat third molars to participate:

- You will be contributing to a national study
- The database will generate a comprehensive operation note for you
- Patients will receive an automated electronic follow-up questionnaire at 3 weeks, 4 month and 12 months
- You will be able to analysis your own data
- You will have participated in a quality improvement project
- Used as part of your Continued Professional Development (CPD)
